

AMENDMENTS TO THE CLAIMS

1. (Original): A kit for decorating a light assembly, said light assembly being elongate, said light assembly having a top wall and a pair of ends, said light assembly illuminating a pair of elongated fluorescent light bulbs, said light assembly being hung from said ceiling by a pair of cables, each of said cables being coupled generally adjacent to an opposite end of said top wall, said light assembly being operatively coupled to a power source, said kit comprising:

a light housing, said light housing having an open bottom side such that an interior and exterior of said light housing are defined, said light housing having a shape generally resembling a car;

wherein said light housing has a pair of openings therein such that each of said cables may extend through one of said openings such that said light housing may be positioned between the light assembly and the ceiling;

a plurality of accessories for individually decorating an exterior surface of said light housing.

2. (Original): The kit as in claim 1, wherein said light housing further comprises:
said light housing resembling a race car, said light housing being substantially transparent, said light housing comprising a plastic.

3. (Original): The kit as in claim 2, further comprising:
a pair of spacing members for placing a space between the light assembly and said interior of said light housing, each of said spacing members being positioned between said light assembly and an interior surface of said light housing, a first of said spacing members being between said top wall of said light assembly and a hood portion of said light housing, a second of

said spacing members being positioned between said top wall of said light assembly and a trunk portion.

4. (Original): The kit as in claim 1, wherein said plurality of accessories comprises:

a plurality of paints, each of said paints having a different color, a portion of said paints comprising spray paints.

5. (Original): The kit as in claim 4, wherein said plurality of accessories further comprises:

a plurality of paint brushes.

6. (Original): The kit as in claim 4, wherein said plurality of accessories further comprises:

a plurality of decals, each of said decals having a different indicia thereon, each of said decals being securable to an exterior surface of said light housing.

7. (Original): The kit as in claim 5, wherein said plurality of accessories further comprises:

a gluing means for gluing items to said light housing, said gluing means comprising a glue.

8. (Original): The kit as in claim 1, further comprising:

a container for holding said accessories, said container having a base wall having a top surface and a bottom surface, said top surface having a plurality of walls thereon such that a plurality of discrete sections are defined, each of said discrete sections being adapted for

holding a portion of said accessories, said container having a shape adapted for being removably insertable in said interior of said light housing.

9. (Original): The kit as in claim 6, further comprising:

a container for holding said accessories, said container having a base wall having a top surface and a bottom surface, said top surface having a plurality of walls thereon such that a plurality of discrete sections are defined, each of said discrete sections being adapted for holding a portion of said accessories, said container having a shape adapted for being removably insertable in said interior of said light housing.

10. (Original): A kit for decorating a light assembly, said kit comprising:

a light housing, said light housing having an open bottom side such that an interior and exterior of said light housing are defined, said light housing having a shape generally resembling a race car such that a hood portion, roof portion, trunk portion and two sides walls are defined, said light housing being substantially transparent, said light housing comprising a material selected from the group consisting of a plastic and a fiberglass;

a light assembly, said light assembly being elongate, said light assembly having a top wall and a pair of ends, said light assembly illuminating a pair of elongated fluorescent light bulbs, said light assembly being hung from said ceiling by a pair of cables, each of said cables being coupled generally adjacent to an opposite end of said top wall, said light assembly being operatively coupled to a power source, wherein said light housing has a first opening in said hood portion and a second opening in said trunk portion such that each of said openings may receive one of said cables;

a pair of spacing members, each of said spacing members being positioned between said light assembly and an interior surface of said light housing, a first of said spacing

members being between said top wall of said light assembly and said hood portion of said light housing, a second of said spacing members being positioned between said top wall of said light assembly and said trunk portion, each of said spacing members comprising a block, each of said blocks comprising a foamed plastic material;

a plurality of accessories for individually decorating an exterior surface of said light housing, said plurality of accessories comprising:

a plurality of paints, each of said paints having a different color, a portion of said paints comprising spray paints;

a plurality of paint brushes;

a plurality of decals, each of said decals having a different indicia thereon, each of said decals being securable to an exterior surface of said light housing;

a gluing means for gluing items to said light housing, said gluing means comprising a glue; and

a container for holding said accessories, said container having a base wall having a top surface and a bottom surface, said top surface having a plurality of walls thereon such that a plurality of discrete sections are defined, each of said discrete sections being adapted for holding a portion of said accessories, said container having a shape adapted for being removably insertable in said interior of said light housing.

11. (Original): A kit for decorating a light assembly, said light assembly being elongate, said light assembly having a top wall and a pair of ends, said light assembly being adapted for being hung from a ceiling by a pair of elongate members, said kit comprising:

a light housing having an open bottom side such that an interior and exterior of said light housing are defined, said light housing having a shape generally resembling a car;

wherein said light housing has a pair of openings therein such that each of said elongate members are extendable through one of said openings such that said light housing may be positioned between the light assembly and the ceiling;

a plurality of accessories for individually decorating an exterior surface of said light housing.

12. (Original): The kit as in claim 11, wherein said light housing is substantially transparent.

13. (Original): The kit as in claim 11, further comprising a pair of spacing members for spacing the light assembly from the interior of said light housing, each of said spacing members being positionable between said light assembly and an interior surface of said light housing, a first one of said spacing members being positionable between said top wall of said light assembly and a hood portion of said light housing, a second one of said spacing members being positionable between said top wall of said light assembly and a trunk portion.

14. (Original): The kit as in claim 11, wherein said plurality of accessories comprises a plurality of paints, each of said paints having a different color.

15. (Original): The kit as in claim 11, wherein said plurality of accessories further comprises a plurality of paint brushes.

16. (Original): The kit as in claim 11, wherein said plurality of accessories further comprises a plurality of decals, each of said decals having indicia marked thereon, each of said decals being securable to an exterior surface of said light housing.

17. (Original): The kit as in claim 11, wherein said plurality of accessories further comprises means for adhering items to said light housing.

18. (Original): The kit as in claim 11, further comprising a container for holding said accessories, said container having a base wall having a top surface and a bottom surface, said top surface having a plurality of walls thereon such that a plurality of discrete sections are defined, each of said discrete sections being adapted for holding a portion of said accessories, said container having a shape adapted for being removably insertable in said interior of said light housing.

19. (New): A housing arrangement for decorating a light assembly, said light assembly being elongate, said light assembly having a top wall and a pair of ends, said light assembly illuminating a pair of elongated fluorescent light bulbs, said light assembly being hung from a ceiling by a pair of cables, each of said cables being coupled generally adjacent to an opposite end of said top wall, said light assembly being operatively coupled to a power source, said housing arrangement comprising:

a light housing, said light housing having an open bottom side such that an interior and exterior of said light housing are defined, said light housing having a shape generally resembling a car,

wherein said light housing has a pair of openings therein such that each of said cables may extend through one of said openings such that said light housing may be positioned between the light assembly and the ceiling; and

a plurality of accessories individually decorating an exterior surface of said light housing.

20. (New): The housing arrangement as in claim 19, wherein said light housing further comprises:

said light housing resembling a race car, said light housing being substantially transparent, said light housing comprising a plastic.

21. (New): The housing arrangement as in claim 20, further comprising:

a pair of spacing members for placing a space between the light assembly and said interior of said light housing, each of said spacing members being positioned between said light assembly and an interior surface of said light housing, a first of said spacing members being between said top wall of said light assembly and a hood portion of said light housing, a second of said spacing members being positioned between said top wall of said light assembly and a trunk portion.

22. (New): The housing arrangement as in claim 19, wherein said plurality of accessories comprises a plurality of decals, each of said decals having a different indicia thereon, each of said decals being secured to an exterior surface of said light housing.

23. (New): A housing arrangement for decorating a light assembly, said light assembly being elongate, said light assembly having a top wall and a pair of ends, said light assembly being adapted for being hung from a ceiling by a pair of elongate members, said housing arrangement comprising:

a light housing having an open bottom side such that an interior and exterior of said light housing are defined, said light housing having a shape generally resembling a car;

wherein said light housing has a pair of openings therein such that each of said elongate members are extendable through one of said openings such that said light housing may be positioned between the light assembly and the ceiling;

a plurality of accessories individually decorating an exterior surface of said light housing.

24. (New): The housing arrangement as in claim 23, wherein said light housing is substantially transparent.

25. (New): The housing arrangement as in claim 23, further comprising a pair of spacing members for spacing the light assembly from the interior of said light housing, each of said spacing members being positionable between said light assembly and an interior surface of said light housing, a first one of said spacing members being positionable between said top wall of said light assembly and a hood portion of said light housing, a second one of said spacing members being positionable between said top wall of said light assembly and a trunk portion.

26. (New): The housing arrangement as in claim 23, wherein said plurality of accessories comprises a plurality of decals, each of said decals having indicia marked thereon, each of said decals being secured to an exterior surface of said light housing.

27. (New): A decorative housing arrangement for covering an elongated light assembly that is configured and arranged for hanging from an overhead structure using a pair of spaced apart, elongated suspension members, said decorative light housing arrangement comprising:

a decorative housing having a shape generally resembling a car, said housing being configured and arranged for being supported by an upper surface area of said light

assembly with an upper portion of said housing disposed between the light assembly and said overhead structure; and

a plurality of decorating components carried on an outer surface of said decorative housing.

28. (New): A decorative housing arrangement as set forth in claim 27, wherein said housing includes a depending skirt configured and arranged to surround said assembly when the housing is supported by the upper surface area of the assembly.

29. (New): A decorative housing arrangement as set forth in claim 27, wherein said housing includes a pair of suspension member accommodating openings in an upper surface thereof.

30. (New): A decorative housing arrangement as set forth in claim 27, wherein said decorating components include at least one decal that is secured to an exterior surface of said light housing.

31. (New): A decorative housing arrangement as set forth in claim 27, wherein said decorating components include a plurality of decals, at least one of said decals having a different indicia thereon than another of said decals, each of said decals being secured to an exterior surface of said light housing.

32. (New): A decorative housing arrangement as set forth in claim 27, wherein said decorating components include at least one indicia painted on an exterior surface of said light housing.

33. (New): A decorative housing arrangement as set forth in claim 27, wherein said suspension members comprise cables.

34. (New): A decorative housing arrangement as set forth in claim 27, wherein said light assembly comprises a fluorescent bulb.

35. (New): A decorative housing arrangement as set forth in claim 27, wherein said overhead structure comprises a ceiling.

36. (New): A decorative housing arrangement as set forth in claim 28, wherein said decorating components include a plurality of decals, at least one of said decals having a different indicia thereon than another of said decals, each of said decals being secured to an exterior surface of said skirt.

37. (New): A decorated light assemblage comprising:

an elongated light assembly;

a pair of elongated suspension members attached to said light assembly at respective opposite ends thereof for hanging the assembly from an overhead structure;

a decorative housing having a shape generally resembling a car, said housing being supported by an upper surface area of said assembly with at least an upper portion of the housing disposed between the light assembly and said overhead structure; and

a plurality of decorating components carried an outer surface of said decorative housing.

38. (New): A decorated light assemblage as set forth in claim 37, wherein said housing includes a depending skirt configured and arranged in surrounding relationship relative to said assembly.

39. (New): A decorated light assemblage as set forth in claim 37, wherein said housing includes a pair of suspension member accommodating openings in an upper surface thereof, said suspension members extending through said openings.

40. (New): A decorated light assemblage as set forth in claim 37, wherein said decorating components include at least one decal that is secured to an exterior surface of said light housing.

41. (New): A decorated light assemblage as set forth in claim 37, wherein said decorating components include a plurality of decals, at least one of said decals having a different indicia thereon than another of said decals, each of said decals being secured to an exterior surface of said light housing.

42. (New): A decorated light assemblage as set forth in claim 37, wherein said decorating components include at least one indicia painted on an exterior surface of said light housing.

43. (New): A decorated light assemblage as set forth in claim 37, wherein said suspension members comprise cables.

44. (New): A decorated light assemblage as set forth in claim 37, wherein said light assembly comprises a fluorescent bulb.

45. (New): A decorated light assemblage as set forth in claim 37, wherein said overhead structure comprises a ceiling.

46. (New): A decorated light assemblage as set forth in claim 38, wherein said decorating components include a plurality of decals, at least one of said decals having a different indicia thereon than another of said decals, each of said decals being secured to an exterior surface of said skirt.
